Performance in FY2021

Inditex continues to expand its global, fully integrated platform underpinned by the key strategic pillars of store & online integration, digitalisation and sustainability.

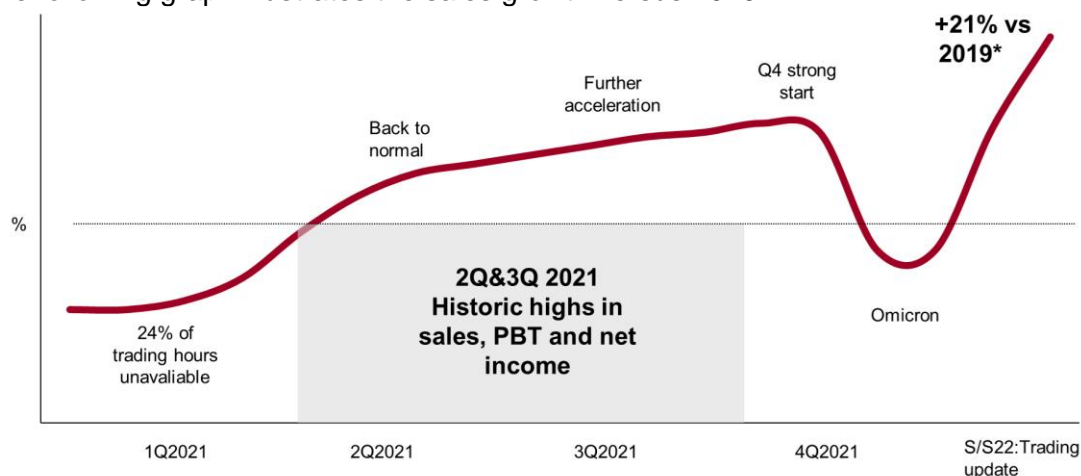

In 2021, Inditex had a strong operating performance. The year was defined by a progressive normalisation of sales and our strong differentiation. The table below shows the full year results:

€ million	2021	21/20
Net sales	27,716	36%
Gross margin	15,814	39%
EBITDA	7,183	58%
Net income	3,243	193%

Net sales reached €27.7 billion, +36% versus 2020. Sales in constant currencies increased 37%. To provide a better comparison with pre-Covid levels, sales in constant currency grew 3% versus 2019 (-2% in 1H and +7.5% in 2H).

The sales volumes were achieved with 5% less stores in operation versus 2020 (13% less versus 2019). The store optimisation programme has therefore been a resounding success.

The following graph illustrates the sales growth versus 2019.

*In this period, sales in the Russian Federation and Ukraine represented approximately 5 ppt of sales growth

In 1Q2021, with 24% of trading hours still unavailable due to restrictions, Inditex's sales trends improved markedly due to healthy store sales productivity and online sales growth.

With a more normalised trading environment in 2Q2021 and 3Q2021, sales, PBT and net income reached record highs. It is especially noteworthy that store sales in 3Q2021 increased versus the record levels set in 2019, with 11% fewer stores in operation.

This performance continued going into 4Q2021. However, the final part of the year was impacted significantly by the decrease in store traffic due to the spread of the Omicron variant, restrictions in most markets and lockdowns in Austria, The Netherlands, Germany, Japan, China and the Philippines.

The sudden drop in store sales generated a one-off impact of €400 million in 4Q2021. The impact on the gross profit due to increased markdowns as a result of the outbreak

was approximately €210 million. Due to the sudden drop in store sales, it was difficult to compensate the incremental store expenses associated with the Christmas season and the additional costs linked to increased online sales. The impact from this was a further €190 million.

Following a decrease in the cases of the Omicron variant and the end of restrictions, the start of the Spring/Summer season 2022 has returned to the previous positive patterns.

Global Online

Online sales came to €7.5 billion and grew 14% to reach 25.5% of total sales. Customer engagement remains very high. Active App's reached 146 million. Online visits in FY2021 have grown 13% to 6.2 billion visits. The Group has 228 million followers on social media.

The RFID and SINT programmes have now been fully rolled out in all concepts. This has allowed Inditex to transition into a company that is more responsive, adaptable, and agile. The migration to the Inditex Open Platform (IOP) is now complete.

Store optimisation is in the final stages as planned (578 stores absorbed in 2021). At the end of FY2021, Inditex operated 6,477 stores. In FY2021, Inditex opened stores in 40 markets.

The number of stores by concept is included in Annex IV.

Outlook

Inditex continues to see strong growth opportunities. The strategic initiatives to strengthen our global fully integrated store and online model are accelerating. Sustainability and digitalisation are key parts of our strategy. We plan to continue developing these key long-term priorities in order to maximise organic growth.

The Inditex business model is characterised by a full integration of stores and online providing the latest fashions with the right combination of quality and price to provide a unique customer experience. The flexibility and responsiveness of the business model in conjunction with in-season proximity sourcing allows a swift reaction to consumer demand with price stability and a unique market positioning.

Inditex has a stable pricing policy. In those markets with temporary material inflation or currency depreciation we make the necessary adjustments to protect the margins. Given these selective actions we expect pricing to contribute to 2022 Spring/Summer sales in mid-single digits, with no impact on volumes as highlighted by the trading update.

At current exchange rates, Inditex expects a neutral currency impact on sales in FY2022.

We expect selective gross space growth in the coming years with highly differentiated, fully integrated, digital and sustainable stores. Gross space growth will take place through new openings, enlargements and relocations. Following the near completion of the store optimisation plan 2020-2021 we expect a neutral space contribution in 2022.

Online sales are expected to exceed 30% of total sales by 2024.

In 2022, Inditex expects a stable gross margin (+/-50 bps).

Inditex's goal is to reinforce the uniqueness of its business model through investments in differentiation, digitalisation and sustainability. Capital expenditure for 2022 will be around €1.1 billion.

Sustainability

Sustainability is a key part of Inditex's strategy*.

Inditex continues to make progress in its sustainable development:

- 1) 100% renewable energy by 2022
- 2) Join Life +50% by 2022
- 3) 100% more sustainable cotton by 2023
